-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 4/21/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Application No. 09/339,190, now US Patent No. 6,757,476 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-3 are rejected under 35 U.S.C. 101 because the claims are non-functional descriptive material recorded on recording medium, and therefore nonstatutory. "Nonfunctional descriptive material" includes but not limited to music, literary works and a compilation or mere arrangement of data. When nonfunctional descriptive material is recorded on some computer-readable medium, in a computer or an electromagnetic carrier signal, it is not statutory since no requisite functionality is present to satisfy the practical application requirement. Merely claiming nonfunctional descriptive material, i.e., abstract ideas, stored in a computer-readable medium, in a computer, on an electromagnetic carrier signal does not make the claim statutory. (see ANNEX IV of 35 U.S.C 101 Interim guidelines of 3/2/06, enclosed).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Oguro et al (US 6,301,430).

Regarding claim 1, Oguro et al disclose recording and reproducing a digital picture signal, including copy protecting television broadcast programs recorded and reproduced as a digital picture signal, comprising:

- a) at least one still picture (see col.4, lines 33-43);
- b) at least one still picture group information for arranging the still picture into a number of groups, the still group information including a first virtual deletion information corresponding to the one still picture for virtually deleting the still picture (see Fig.9; and the sync blocks; col.5, lines 12-20 and col.8, line 16-37);
- c) at least one additional audio group information for arranging at least one additional audio parts into a number of groups, the additional audio group information including second deletion information for virtually deleting the one or more of the

additional audio parts (see Fig.9, the sync blocks and col.5, lines 12-20 and col.5, line 66 to col.7, line 7);

d) wherein the one additional audio group information includes additional audio group general information containing a start position of an additional audio group (see at least Fig.2, the ITI header and Start Sync Block Area (SSA); col.3, lines 54-67).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamauchi et al (US 6,047,103) teach an information recording medium for recording an information signal representing at least one of program data, audio information, and video information, data transmitting device/method for retrieving the information signal from the information recording medium, a data receiving device for reproducing a video signal from the retrieved video digital data, and an information processing apparatus including the data transmitting device and the data receiving device.
